## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

The species are as follows:

#### **First Species Election Requirement:**

Species A: samples deposited onto the surface of a three dimensional structure.

Species B: samples deposited within the interior of a three dimensional structure .

The species listed above are distinct because they differ structurally and require differing depositing and data collection elements. Claims 3, 5-17 correspond to Species A and Claims 18-31 correspond to Species B. Claims 1-2 and 21-71 are generic to the above species.

#### **Second Election Requirement:**

Species C: elements of the array are not performance tested.

Species D: elements of the array are performance tested.

The species listed above are distinct because they differ in the quality and expected results of array screening because the performance tested elements are exposed to various external agents thereby physically, chemically, and/or structurally altering the array elements. Claims 1-40, 48-58 and 67-71 correspond to Species C and Claims 41-47 and 59-66 correspond to Species D.

#### **Third Election Requirement:**

Species E: data collection using non-spatially resolved measurement tools.

Species F: data collection using spatially resolved measurement tools.

The species listed above are distinct because they differ in the quality, specificity and quantity of data collected and processed. Claims 1-47 and 55-66 correspond to species E and Claims 48-54 and 67-71 correspond to species F.

Art Unit: 1634

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1634

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
